Education

National Institute of Technology (NIT) Srinagar

Bachelor of Technology (B.Tech), Computer Science

2023–2027

Skills

Languages: C++, Python, SQL, Go, JavaScript

Backend: Node.js, Express.js, Go

Databases: MongoDB, MySQL

Frontend: React.js, React Native, HTML, CSS

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Technologies: REST APIs, WebSockets, JWT Authentication

Tools: Git, GitHub, Postman

Experience

Software Development Intern — Elevance Skills

Internship

- Developed a full-stack bus booking platform using React.js, Node.js, Express.js, and MongoDB.
- Designed 10+ REST APIs for authentication, route search, and booking management using JWT.
- Modeled MongoDB schemas for 4 core entities: users, buses, routes, and bookings.

Projects

Healify – AI Healthcare Platform

[GitHub](#)

- Built a full-stack healthcare platform for doctor appointment booking and real-time slot availability.
- Designed a concurrent appointment scheduling system to prevent duplicate bookings.
- Implemented WebSocket-based live updates for appointment status and medicine delivery.
- Created a location-based delivery system to assign the nearest delivery partner within 3 km.
- Integrated an AI chatbot to provide symptom-based health assistance.
- Developed REST APIs and MongoDB schemas for users, doctors, appointments, and deliveries.

Real-Time Chat Application

[GitHub](#)

- Created a real-time chat application using Node.js, Express.js, MongoDB, and WebSockets.
- Implemented online/offline presence tracking for connected users.
- Built follow/unfollow functionality and story sharing similar to social media platforms.
- Managed real-time user sessions and synchronized live data across connected clients.
- Optimized real-time message delivery using WebSockets.

ShopSwift – E-commerce Platform

[GitHub](#)

- Engineered a full-stack e-commerce platform with product, cart, and order management.
- Integrated Razorpay payment gateway with Cash-on-Delivery support.
- Built an admin dashboard for managing users, products, orders, and payments.

BlogForge – Blogging Platform

[GitHub](#)

- Created a blogging platform with CRUD operations for creating and managing blog posts.
- Integrated AI-powered content generation to create blog drafts from user prompts.

Achievements

- Solved 450+ DSA problems across LeetCode and GeeksforGeeks.
- Proficient in Arrays, Strings, Linked Lists, Trees, Graphs, Dynamic Programming, and Sliding Window.
